RHUS COTINUS ROYAL PURPLE

\* (New dark purple-red leaf Smokebush) \*

\* There are several varieties of Purple Smokebush although Royal Purple is  
\* considered the very best. A number of varieties of Smokebush have been  
\* tried out in the nursery with Royal Purple always turning out to be the  
\* most outstanding. I am convinced of this to the extent that it is the  
\* only one now being propagated in the nursery. Royal Purple keeps its  
\* rich dark purple reddish colored foliage from Spring to late Fall. In  
\* late summer the matured leaves show a mottled edge which is a light red  
\* edge around the dark purple leaf. It is an outstanding plant in that it  
\* draws the attention of all who visit the nursery and is greatly admired  
\* for its brilliant foliage. The foliage is darker than any red Japanese  
\* maple. The plant is adaptable for use as a lawn specimen especially in  
\* locations where the Japanese Maple is not hardy. Royal Purple is the  
\* only Purple Smokebush to receive a Certificate of Merit from the Royal  
\* Horticultural Society. The branches make an excellent filler for bouquets. \*

\* \*\*2,500 1 yr. grafts bedded .75 .60

\* 1,500 2-2½', 2-5 branches, B.R. 1.25 1.00 \*

 RHUS COTINUS ROYAL PURPLE  
 (New dark purple-red leaf coloration)  
 There are several varieties of Purple Smokebush although Royal Purple is  
 considered the very best. A number of varieties of Smokebush have been  
 tested out in the nursery with Royal Purple always turning out to be the  
 most outstanding. I am convinced of this to the extent that it is the  
 only one now being propagated in the nursery. Royal Purple keeps its  
 rich dark purple reddish colored foliage from spring to late fall. In  
 late summer the matured leaves show a mottled edge which is a light red  
 edge around the dark purple leaf. It is an outstanding plant in that it  
 draws the attention of all who visit the nursery and is greatly admired  
 for its brilliant foliage. The foliage is darker than any red Japanese  
 maple. The plant is adaptable for use as a lawn specimen especially in  
 locations where the Japanese Maple is not hardy. Royal Purple is the  
 only Purple Smokebush to receive a Certificate of Merit from the Royal  
 Horticultural Society. The branches make an excellent filler for bouquets.

Shipping-out stock can be shipped both inside and outside the Boston area.  
 Orders cannot be accepted for landscape size shrubs and B&B stock which  
 require boxing or baling. Such stock should be picked up at the nursery  
 or arrangements made for truck delivery.

Prices are F. O. B. Newport, R. I.  
 I to 249 take the 100 rate.  
 250 and up take the 1,000 rate.  
 Terms: 25, 10 days, net 30 days.

I MAKE NO CHARGE FOR PACKING. IT IS PART OF MY FRIENDLY SERVICE.

"WHERE QUALITY EXCELLS"

# Novelties

*New*

## VIBURNUM CARLESI COMPACTA

This plant was discovered several years ago in the nursery in a block of *Viburnum carlesi*. It is slower growing and has distinct dark green shiny leaves. It grows into a very compact plant and for this reason is called Compacta, ideal for use in foundation plantings. It buds up very heavily when a matured plant. The size, color and fragrance of the flowers are exactly like those of *Viburnum carlesi*. This plant is a distinct novelty of which a limited quantity is offered.

## HYDRANGEA PETIOLARIS

(Climbing Hydrangea) →→→

An attractive vine which does equally well in shade or sun. Its foliage is bold, clean and shrub-like and a rich dark green color. Short spur branches are topped with white, fragrant, Hydrangea-like blooms during the summer and lasts for a considerable period. Climbing Hydrangea is one of the finest and choicest vines grown. It clings by rootlets to walls and trees without support and can be planted against rocks for a cover.

1-year pot grown, RC, 2 1/2-in. pots	.50	

## VIBURNUM WRIGHTII

Upright and grows slower than *Viburnum dilatatum*. The leaf is deeply veined and the bright red berries color up in August and remain bright red throughout the fall even after the foliage takes on a fall color. The plant is excellent for berry effect. Being slow growing makes it suitable for use in ranch-type house plantings.
